

RADA Russian American Dental Association with Holy Name Medical Center

Present

Helping Survivors of Trauma: Partners in Advancing Humanistic Care

Launch Date: 3/15/2021

Expiration Date: 3/15/2024

Target Audience

This program is intended for physicians, dentists, nurses, allied health professionals, and any other medical professional that treat and care for Holocaust survivor patients.

Objectives

- ✓ Differentiate Holocaust survivors from other elderly patients in a healthcare setting.
- ✓ Identify situations that may trigger trauma for a Holocaust survivor during routine healthcare activities.
- ✓ Explain how a person-centered, trauma-informed (PCTI) approach can be used to reduce re-traumatization of Holocaust survivors and other victims of trauma.

Instructions to receive credit

In order to receive 0.5 CE AGD PACE credit from RADA for this activity, the participant must complete the interactive enduring activity in full, which consists of the pre-survey, content and videos, knowledge check questions, and the post-module survey. Additionally, the participant must complete the post-activity evaluation, linked after the post-module survey. Please plan 30 minutes to complete the activity.
